Dust, bird droppings, pollen, and pollution can reduce solar efficiency by up to 30% — regular professional cleaning ensures your panels operate at full capacity all year round. Request a Quote Roofs.com.au Why Solar Panel Cleaning Matters Dirty panels = less power. Over time, even a thin layer of grime can block sunlight from reaching your solar cells, leading to significant energy loss. In some cases, dirt buildup may even void your manufacturer's warranty. Expert Insight: "If you've noticed your energy savings dropping, your panels might just need a clean. Regular solar panel cleaning can restore output and catch issues like loose fittings, corrosion, or hail damage early." — Tara L., Senior Technician at Roofs.com.au Request a Quote Roofs.com.au Our Solar Panel Cleaning Process At Roofs.com.au , we follow a safety-first,

results-driven process tailored for both residential and commercial solar systems : Pre-Clean Inspection We assess your roof and panels for cracks, corrosion, or storm damage before any work begins. Debris Removal We safely remove leaves, branches, and other surface debris using soft tools to prevent scratching. Filtered Water & Soft-Bristle Tools Using purified, deionised water and non-abrasive equipment, we gently remove dust, grime, and bird droppings. This prevents mineral stains and leaves a spotless, streak-free finish. Panel Check-Up We inspect for mounting issues, broken seals, or signs of wear. If we spot any problems, we'll flag them immediately — and can often coordinate with a solar electrician for repairs. Post-Clean Report (Optional) For commercial or large installations, we provide photo documentation of the before-and-after condition and offer drone inspections as needed.

Roofs.com.au Benefits of Professional Solar Cleaning Boost Energy Output by 15–30% Prolong Panel Lifespan Avoid Warranty Voids Spot Issues Early Safe, Damage-Free Roof Access Pro Tip: “Avoid DIY solar panel cleaning with garden hoses or harsh chemicals. This can damage panel coatings and create hard water stains. Professional cleaning is safer and more effective — especially on tile or metal roofs .” Request a Quote Roofs.com.au When Should You Clean Your Solar Panels? We recommend cleaning your solar panels: Every 6 to 12 months , depending on your location After heavy storms , bushfires, or dust events If you live near: Construction zones High-traffic roads Coastal/salty environments Trees or bird activity Request a Quote Roofs.com.au Combine with Roof or Gutter Services Why stop at your panels? Many of our customers combine solar panel cleaning with: Roof Cleaning Gutter Cleaning Roof Inspections Moss and Lichen Removal Soft-Wash Roof Cleaning Bundle services to save money and time while keeping your entire roof system in peak condition. Request a Quote Roofs.com.au Safe for All Roof Types We safely clean solar panels mounted on: Terracotta or concrete tiles Colorbond or other metal roofs Slate Flat roofs and skillion roofs Green roofs and custom structures Have an older roof or suspect issues like loose flashing ?
